Chumerna Glacier

From Wikipedia, the free encyclopedia

Coordinates: 64°08′10″S 62°06′20″W

This article includes a list of references, related reading or external links, **but its sources remain unclear because it lacks inline citations**. Please help to improve this article by introducing more precise citations. *(May 2021) (Learn how and when to remove this template message)*

Chumerna Glacier (Bulgarian: ледник Чумерна, romanized: *lednik Chumerna*, IPA: [ˈlɛdnik ʧoˈmɛrnɐ]) is the 2.2 km long and 1.9 km wide glacier draining the north slopes of Stavertsi Ridge on Albena Peninsula, Brabant Island in the Palmer Archipelago, Antarctica. It flows northeastwards to enter the channel between Brabant Island and Liège Island east of Hales Peak.

The glacier is named after Chumerna Peak in eastern Balkan Mountains, Bulgaria.
